PREMIUM ADVENTURE TOOLS

Silky has developed an exclusive line of products, specially designed for outdoor and hunting. The Outback series includes 4 models: a Pocketboy, Gomboy Curve and Bigboy 2000 folding saw, and a Nata Double Edge hatchet.

An inconspicuous tool with outstanding cutting performance that will accompany you on your hunting or bushcraft adventures in the woods, the Outback series offers that ultimate outdoor experience!

Holster included
Blade length: 240 mm
Weight: 970 g

The ultimate axe for outdoor users. With comfortable Genki grip and double ground blade for outdoor cooking, splitting wood or batoning.

OUTBACK
Edition

ARBOR COMPOSITE GRIP

This handle is made of an environmentally friendly composition, containing 70% wood powder. Giving a warm and comfortable touch and superior control, especially with greasy substances.

GENKI GRIP

This handle consists of only two parts of thick rubber and can be zipped off the blade without the use of tools. The Genki grip absorbs shocks to a maximum and offers a superior grip.

BLACK COATING

The dark, non-reflective color of this coating is particularly suitable for tactical operations. A unique nickel and tin blend provides a long blade life and an incredible cutting performance.

BLACK OXIDE COATING

Through a special oxidation process, the blade gets an even deeper black color than the regular black coating, which generates a strong stealth effect.
